The Sverdlovsk AMM/SAM Launch Complex, located 20 nautical miles (nm) NE of Sverdlovsk, USSR, was identified in [REDACTED]. The complex was not present in [REDACTED]. [REDACTED] the electronics site and a portion of the support area could be seen, although the complex was not identifiable at this point.

25X1D

In its present stage of development the complex consists of 3 launch sites and an electronics site under construction, and a support area.

At this time the configuration of the complex resembles that of Sary-Shagan AMM/SAM Launch Complex 1. However, a possible fenceline west of the existing launch sites encloses an area capable of accommodating 2 additional launch sites, possibly producing the 5-site configuration seen at Tallinn and Cherepovets AMM/SAM Launch Complexes. No specific details, other than the road pattern, are discernible at the individual launch sites.

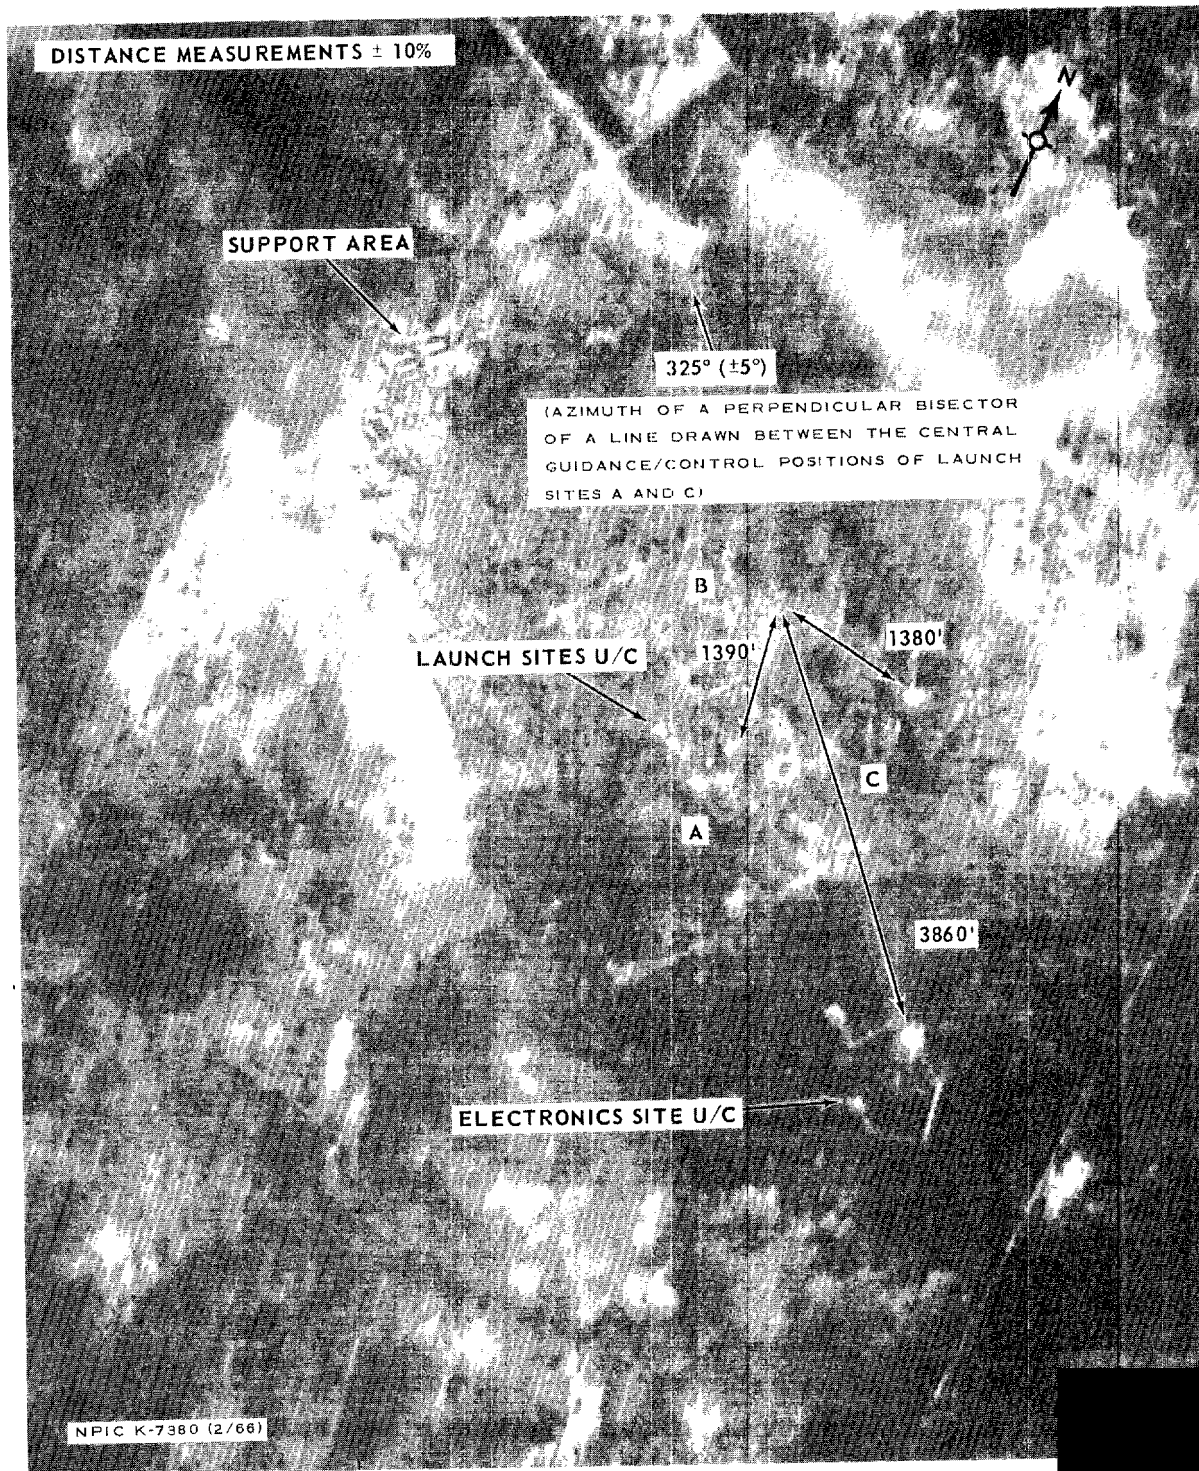

The electronics site, located approximately 3,860 feet SSE of Launch Site B, consists of clearings for 2 radar positions and a probable central control position.

A support area, located NW of the launch sites, is composed of approximately 15 buildings.
